

Binary entropy function

 You are using more than 2 classes. The results cannot be displayed on the Binary Entropy graph. It only represents the Entropy curve for 2 classes.

Example attribute

Classes	Nr. of instances
---------	------------------

Class 1:	<input type="text" value="6"/>
----------	--------------------------------

Class 2:	<input type="text" value="4"/>
----------	--------------------------------

Class 3:	<input type="text" value="6"/>
----------	--------------------------------

	<input type="text" value="-"/>
--	--------------------------------

<input type="button" value="+"/>	
----------------------------------	--

	16
--	----
